Are you ready to take the next step with your finances as a stipend-receiving graduate student?

Do you want to learn how to allocate your money more optimally, break the cycle of living paycheck to paycheck, build up savings, and/or begin investing?

This seminar teaches graduate students who receive stipends how they can develop positive lifelong financial habits and increase their net worth while still in school. The topics covered in this seminar include financial values and goals, budgeting, taxes, saving, investing, and debt repayment. The presenter is Emily Roberts, who holds a Ph.D. in biomedical engineering and is the founder of the websites Grad Student Finances and PhD Stipends.
