Team Science for the 21st Century

January 31, 2020 | 8:30 am to 12:00 pm
UC Davis Activities and Recreation Center, Ballroom A

Registration: https://www.eventbrite.com/e/86379957779

Do you want to work more effectively in a team?
Are you trying to solve problems that require a team approach?
Want to know more about why you should work in a team?

Team science approaches are increasingly important as collaborative work is necessary to solve big problems. This workshop will provide an overview of team science for researchers of all levels (e.g., trainees, faculty, staff) to learn how to incorporate these strategies into their work. Participants will engage in hands-on learning experiences and leave with resources and tools to carry out this work. Researchers from all disciplines are welcome.

Schedule of Events
8:30-9:00 Coffee and Welcome
9:00-10:00 Keynote Presentation
Dr. Raymond Rodriguez, Professor Emeritus,
Dept. of Cellular and Molecular Biology
10:00-11:00 Panel Discussion
11:00-12:00 Break Out Group Activity
