Avian Sciences Graduate Group
GSR Policy

Our goal is to maximize graduate student support based upon our resource constraints. The baseline support for graduate students in our program is a 50% GSR I for both years. Since graduate students in our program are typically working side by side with first and second year PhD students from a variety of programs with a variety of guaranteed stipends (currently \$11,700 to \$21,500), our policy is that we encourage faculty to liberally adjust GSR level upwards to be equitable within their laboratory for the specific situation.
